MOTOR BOAT RUNS ON SEAWEED PATCH

Lobster Fisher Makes Use of Yankee Ingenuity.

East Harpswell, Maine.—Patching a motor engine with seaweed and making it run is the latest achievement of Yankee ingenuity.

When Carroll Merriam started for a trip in his motor boat to haul his lobster pots he found that nocturnal marauders had stripped his craft. They stole cars, brass running lights, six cells of battery and oilskins, and, worst of all, they cut his six-foot copper gasoline feed line connecting the tank with the carburetor.

With no place within miles where he could obtain copper pipe, with no near neighbors and with an order to furnish fifty fine lobsters at 50 cents a pound for a noontime shore dinner, Merriam shoved that Yankee ingenuity still flourishes.

He had a battery for a radio set in his home, and this he soon connected with his motor.

Then he rowed his dory out a few hundred yards to the Seal ledges, where he found a piece of kelp or devil's apron with an eight-foot stem that was hollow. Taking this ashore, he pushed one end over the end of the severed pipe projecting from his fuel tank and the other end left at the carburetor.

Wrapping them tightly many times from a roll of friction tape, he thus improvised out of the hollow stalk a fuel pipe line that enabled him to haul his traps and fill his order.

Begin Classifying of 7,200 Kinds of Plants

Washington. — The classification and identification of a large collection of tropical flowers, ferns and plants gathered last winter in the lofty mountains and dense jungles of eastern Colombia, some of which have never before been seen by an American, is the summer's task confronting Dr. Ellsworth P. Killip and Albert C. Smith of the Smithsonian Institution.

Doctor Killip, assistant curator, and Mr. Smith, collaborator in the division of plants of the national museum, spent four months in the eastern cordillera of Colombia north of the Bogota region and brought back nearly 30,000 specimens representing about 7,200 varieties of plant life.

These included 300 "collecting numbers" of ferns, 300 of orchids, more than 200 of the mimosa and cassia families, about 75 morning glories and 100 passion flowers. Sets of the specimens have been distributed among the various institutions co-operating in the expedition, which was part of the botanical exploration of northern South America begun in 1917 by the New York Botanical Garden, the Gray Herbarium of Harvard university, and the National museum.

Mound Builders Were Mongoloids From Asia

Quincy, Ill.—That the Illinois mound-builders are to be classed with the American Indians, and that they are not a mysterious Asiatic race, is the belief of Prof. William M. Krogman of the University of Chicago, here with Prof Faye Cole of the department of anthropology, to conduct explorations.

It is Krogman's theory that the Indians were a mongoloid people from Asia who made their way to this country by way of the Aleutian chain of islands and then gradually spread in many directions.

The migration, Krogman thinks, came in successive waves, new arrivals from Asia, coming and pushing the tribes that were previously here further south, east and west.

The period of initial migration is placed at 10,000 years ago. The first comers had the Neolithic, or late Stone age culture, using stone weapons and ornaments, while the dog was the only domesticated animal.

Centuries later, after the Spanish came, the Indians began to use horses. Krogman traced the formation of the Maya, Aztec and Inca settlements in North and South America and which developed a comparatively high civilization.

Hark to the Sage

"He who knows ill of his neighbor," said Hi Ho, the sage of Chinatown, "should keep silent; lest he show how easy it may be to have knowledge without wisdom."—Washington Star.

QUITS SOLITUDE AFTER 30 YEARS

Western Hermit Back to Society of Fellow Men.

Fort Morgan, Colo.—After living for 30 years in the mountains of western Colorado as a primitive cave man, shunning human society, hunting for his food, and wearing the skins of animals for clothes, Reuben Dove, sixty-two years old, has at last been forced to seek the society of his fellow men and has decided to spend the rest of his life in that human society that formerly he avoided.

When Dove was a young man, during the early '90s, an agent for a railroad that was building in the Centennial state contracted with him to furnish a large number of railroad ties. For these he offered Dove a good price. The young man labored hard during the winter, and when the agent came around he had a considerable supply of ties on hand. But the railroad man rejected about one-fourth of the ties, saying that the company would not take such poor stuff. Dove thought this a grave injustice and he declared on the spot that we would never do another day's work for any man. This vow he has kept for nearly a third of a century.

Before leaving the pile of ties he made a bonfire of it, and with some of his belongings went back into the Rockies, where he dwelt in a cave for more than 30 years.

When he had been missed for several months a forest ranger went to his cave and found him ill with a raging fever. He was taken to a hospital and later to the home of a relative, where he will spend the remainder of his days. He was known as the "hermit of Hubbard Park."

Moslem Maidens Win Right to Inheritance

Aleppo, Syria.—Mohammedan maidens henceforth will have a right to share the inheritance of their fathers with the sons of the family.

The court at Aleppo recently ruled that the French law concerning open successions should apply in the part of Syria under French mandate.

Heretofore the Koranic law providing that everything should go to the sons of the family, leaving the girls to look out for themselves—or for husbands—has applied. During the court trial the rights of women to have a slice of the family financial pie in Syria were upheld by Henry Lemery, senator from Martinique in the French parliament. It was estimated that $8,000,000 were represented by the claims of women that would be affected immediately by the court decision.

The men of Syria have not taken kindly to the decision. In order to put their women folk back in their old places they have appealed from the Aleppo decision before the Supreme court at Beyreuth.

Bicycle Is Main Vehicle for Holland's Population

Leyden, Holland.—Bicycles are more frequent in Holland than automobiles in the United States. There is a "rijwiel," or bike, to every 2½ inhabitants. In a university town like Leyden virtually every student, male or female, owns a wheel.

The great popularity of the bicycle is attributable to the fact that there are practically no hills in Holland.

The importance of the bicycle is recognized by the authorities in that they provide separate "rijwiel pads" or bicycle roads running parallel to the automobile and horse-drawn vehicle roads.

The pedestrian in Holland must take far greater care not to be run over by a bicycle than by an automobile.

Woman Scents Thieves by Scent They Stole

Berlin. — Three bold gentlemen burglars, their pockets bulging with booty, were leisurely descending the staircase of an apartment house in the Berlin suburb of Steglitz one night when a couple, occupants of the apartment just rifled, came walking up.

The thieves excited no suspicion until the wife sniffed the air. "Why that's my own scent," she exclaimed. Then the man started to run. On being caught they confessed having in the course of their operations liberally dosed themselves from the scent bottles in the women's bedroom.

PUBLIC APPROVAL

is revealed in the most concrete and convincing way by

SALES

A BUYER'S name on the dotted line of an order blank is high praise—sincere, conclusive, convincing.

And careful buyers, thousands of them, are purchasing these 6 cylinder Graham Brothers Trucks—enthusiastic over their smooth, obedient power, proud of their fine appearance, surprised at the speed obtainable with perfect safety because of their 4-wheel brakes . . . .

Claims, promises and ballyhoo are crushed under the weight of purchasers' dollars.

See these trucks . . . . Drive the size that fits your business needs—they are built in the sizes that fit 95% of all hauling or delivery requirements.

You will see *why* truck operators everywhere are buying—*why* deliveries are being made at the rate of more than 300 a day.

THURSDAY, JULY 26, 1928.

Baptist Asso. Resolute on Prohibition

A very harmonious session of Appomattox association was held at Spout Springs Baptist church on the 18th being presided over by moderator Rev. John E. White. A large crowd was in attendance and the church was filled to overflowing while many stood on the out side. Dinner was served by the ladies of the church consisting of fried chicken, old Va. hams, mutton, shoat and beef, pickles, also pies and cakes of every discription.

The morning service program opened at 10 o'clock with prayer by Rev. J. J. Parsons: words of welcome by the pastor, Rev. A. I. Cuddle and response by J. W. Bradner; report on State Missions was made by A. R. Harwood; address: The kingdom in our state, by George R. Pankey; report on home missions by B. F. Ginther; address "The kingdom in our southland", Rev. R. S. Booker; a quartette was sung by 4 members of Concord church of Charlotte county; executive committee report was made by Rev. W. H. Petties, Jr., and the annual sermon was delivered by Rev. T. E. Goad.

The afternoon session was as follows: devotional by J. J. Parsons: report on W. M. U., by Mrs. W. L. Watkins: "Our women's work", Miss May Campbell; address by Rev. J. W. Cammack on "Piedmont summer assembly"; report on orphanage, Virginia Baptist Hospital and ministers relief and annuity, by Rev. J. H. Gordon; address "caring for the orphan", a solo, "Mothers Prayer", by Rev. Jones, G. A. Harris, our own hospital, W. S. Royall and the Va. Baptist foundation, Rev. W. B. Ingram. The closing session was held on the 19th with quite a number of attractive speakers, among whom was Rev. Crabtree a returned missionary from Brazil.

The following resolution was passed regarding prohibition: Resolved, That we do hereby express our satisfaction with the prohibition laws as they now stand, that we commend the national and state administration as well as the local officers for their vigilence and their efforts to enforce them and we resent any effort on the part of anybody to weaken them.

Resolutions were also passed endorsing the activities of the Anti-Saloon League.

All Virginia farmers and farm women who can possibly do so should arrange to visit their state college of agriculture at Blacksburg the first week in August because this is the time when they can come to V. P. I. for instruction, recreation and wholesome pleasure, meet agricultural workers and people interested in agriculture, get the latest information on farm and home practices, and equip themselves to go back home and do better farming or home keeping.

In summer time give the refrigerator extra care, and wash it thoroughly with hot water and soda once or twice a week. See that anything spilled is promptly wiped up, that the drainpipe is not clogged or slimy, and that the ice chamber is clean. Keep the doors shut tightly and do not open them oftener than necessary. Do not wrap the ice in paper or cloth.

Let us have your next order for printing. Quick work. TIMES-VIRGINIAN.

Bean Beetle

The Mexican bean beetle, formerly known principally in the Southwestern States, has spread very rapidly during the past ten years through the Eastern States; in many localities it has been abundant for a season and then has subsided, only to reappear in injurious numbers two or three years latter. It is the most serious insect enemy of edible beans wherever it appears in the United States and attacks all kinds of common garden beans, tepary beans, Lima beans kidney beans. The Mexican bean beetle when fully mature is copper-colored and bears 16 black dots on its wings. It appears in the fields about the time the earliest planted beans show above ground, and all stages of the pests may be found throughout the entire summer if not controlled. Considerable work on control measures has shown that the materials which will give best control without injuring the plants are magnesium arsenate or a good grade of calcium arsenate with lime, applied as either a dust or spray to the under-sides of the leaves.

Careful handling of potatoes, particularly where they are to be held for storage, will largely prevent loss from Fusarium rot. This disease is responsible for the loss of from 5 to 10 per cent of the annual crop, and in some cases individual growers have lost 50 per cent of their crop. Mechanical injuries such as cuts, bruises and skin abrasions, caused by improper handling, are the chief source of Fusarium rot. Every minute skin abrasions may become the seat of fungous infection. Moving a liberal quantity of soil with the tubers and protecting them from the sharp edges of the forks, shakers, etc., of the diggers by rubber or burlap will reduce mechanical injury.

Many alfalfa growers, who cut the hay at full bloom or in the early pod-stage of maturity, a practice especially common in the North Central and Rocky Mountain States, could produce hay of better quality if they would cut it when 1-10 to 1-4 in a yield sometimes begins to starts from the crowns, irrespective of the bloom. This would advance the time of cutting a week or so for the first cutting and increase the yield correspondingly because of the longer period given to subsequent cuttings. Large quantities of late-cut alfalfa are marketed annually in the United States as hay of the type of hay grades only U. S. No. 2 or No. 3. because of insufficient leaves or lack of color. Late-cut alfalfa also has hard and somewhat woody stems, which, although not very objectionable to horse or stock-cattle feeders, are not wanted by dairymen who are the chief buyers of alfalfa hay.

Discovers New Vitamins Assists Normal Growth

San Francisco.—A new vitamine, the sixth now known to science, and held capable of stimulating normal growth in undersized animals, has been discovered following long research with rats in the laboratories of the University of California.

Dr. Herbert M. Evans, chairman of the department of anatomy at the university, made the announcement. The vitamine, he said will be known as "Vitamine F," to follow after "Vitamine X," which was also discovered at the University of California.

The vitamine, said Doctor Evans, is essential to normal growth in animals, "which attain scarcely more than half their size and remain sexually immature without it." The experiments resulting in the discovery were entirely with rats, but would bring similar results in other animals, he said.

"When a food mixture consisting of highly purified casein and recrystallized cane sugar was employed," Doctor Evans said, "with the addition of necessary salts and the five known vitamines, the rats were scarcely more than half the normal size. Growth stopped altogether and the animals remained sexually immature. Natural food was necessary to awaken their growth and convert them into healthy animals.

"Among the natural foods, lettuce and liver were the most potent, and they therefore almost certainly contain the new sixth member of the vitamines."

Holly Wood Valuable

The wood of the holly tree, whose foliage is so indispensable during the holiday season, is highly prized by the makers of mathematical instruments.

Venerable Cypress

A cypress tree in Santa Maria de Tule, near Oaxaca in southern Mexico, believed to be 2,000 years old, rises to a height of 140 feet and is 110 feet around.

Passing Observation

Nothing is impossible. The radio's been invented, the sea's been crossed by airplanes and people even can learn to economize if they try hard enough.

Hee-Haw!

For Sale—one donkey, between nine and ten years old. Mother-in-law says her legs are too short, and she can't ride him because she has corns on her toes and her feet bump on the ground. —Ad in a Marysville (Calif.) paper.

Six VICTORIOUS MONTHS for THE VICTORY SIX

When the Victory Six was announced six months ago it was the talk of the town.

What would it look like? What would it do? Would it be different from other cars? In what way? And so on.

Then the public saw the Victory Six!

Its freshness of design was a revelation. It *was* different. Like no other car.

Rakish and trim—low and graceful—smart hued and colorful—it captured the eye. Immediately.

Look again. Wider seats—more leg space. Big! Roomy!

Then it proved, in operation and performance, the promise suggested by its beauty.

Swift pick-up—smoothness—speed.

Dodge Brothers dependability again!

It was a great car then; it is an even greater car now.

It has stood the test.

Each month has seen a substantial increase in Victory Six sales.

Not because of what we have been saying for six months. Or because of what we say now.

But because of what the Victory Six *is*.

The snappiest, best looking, speediest car in its class.

A car you should try out—now—yourself at the wheel.

RELIEF FROM CURSE OF CONSTIPATION

A Battle Creek physician says, "Constipation is responsible for more misery than any other cause."

"But immediate relief has been found. A tablet called Rexall Orderlies has been discovered. This tablet attracts water from the blood stream to the bowels, cleansing bowel called the colon. The water softens the dry food waste and causes it to pass thoroughly, natural movement without formation habit or ever increasing the dose.

"Avoid suffering from constipation. Chew a Rexall Orderlies at night. Next day bright. Get 36 for 36c today at nearest Rexall Drug store.

Notice of Meeting to Consider Rules and Regulations for the Further Protection of Game and Fish

WHEREAS, by clause 7 (subsections a, b, c and d) of section 3167 of the Code of Virginia, as amended by Chapter 146 of the Acts of 1928, the Commission of Game and Inland Fisheries is authorized to propose and adopt rules and regulations restricting, still further than is provided by general law, the destruction of game birds, fur-bearing and hair-bearing animals and game fish, and to prescribe penalties for violations thereof; Now, therefore, notice is hereby given that a meeting of this Commission, to which the public is invited to attend, will be held in the hall of the House of Delegates, Richmond, Va., on Saturday, August 4, 1928, at 9 A. M., to consider and act upon the proposed rules and regulations herein enumerated, as follows:

No. 1. Fishing.—THAT, it shall be unlawful for any person to kill or capture fish of any species in any of the waters of this State, other than those which are specifically designated in the next subsection (b) hereof, by angling or means whatever other than by angling with hook and line or cord and reel, except as follows:

(a) A hand net may be used to land fish caught by hook and line or cord and reel.

(b) A hand net not exceeding six feet square in size may be used for catching minnows to be used as bait.

(c) Any person may take any species of fish, in any of the waters of this State, other than trout, by means of a gig six feet square in size in the form and streams on his own lands.

(d) The Chairman of this Commission may issue to reasonable parties permits for the use of seines or gigs in the elimination of carp in any of the waters of the State.

(e) The provisions of this resolution shall not apply to the counties of Accomac, Alleghany, Augusta, Charles City, Chesterfield, Elizabeth City, Essex, Fairfax, Gloucester, Hanover, James City, King and Queen, King George, King and Queen, King William, Lancaster, Mathews, Middlesex, Nansemond, New Kent, Norfolk, Northampton, Northumberland, Prince George, Princess Anne, Richmond, Southampton, Stafford, Surrey, Sussex, Warwick, Westmoreland and York, and to the towns and cities located therein, which are defined in section 3162 of the Code of Virginia as Tidewater Virginia.

No. 2. Deer.—THAT, it shall be unlawful for any person to hunt deer in the counties west of the Blue Ridge mountains between December 1st and November 15th, following, or to hunt the same in said counties at any other time.

No. 3. Ruffed Grouse, Pheasants and Quail or Partridge.—Shortening still further that is provided by general law the season for hunting ruffed grouse, pheasants and quail (or partridge) in each county in the State and fixing different seasons therefor in such counties or zones as may be deemed advisable.

No. 4. Bag Limit on Turkeys.—THAT, it shall be unlawful for any person to kill or capture in excess of 2 turkeys a day and 5 in a season.

No. 5. Bag Limit on Hares or Rabbits.—THAT, it shall be unlawful for any person to kill or have in excess of 10 hares (or rabbits) a day and 150 a season.

THAT, the above proposed regulations, or such parts thereof as may be adopted, shall not apply in those counties which have special acts of the legislature relating to the subject matter hereof and therein otherwise providing; and, further, that ordinances of boards of supervisors relating to the subject matter hereof and therein otherwise providing passed under authority of section 2743 of the Code of Virginia and now in effect, be not repealed only in so far as the same may be inconsistent with any regulation promulgated hereto which may be promulgated.

THAT, the penalty for violating any regulation which may be promulgated by this Commission and ordinances of boards of supervisors, passed under authority of section 2743 of the Code of Virginia, and not repealed, shall be a fine of not less than $10.00 nor more than $50.00 and cost of trial, or 30 days in jail, or both.

By order of the Commission of Game and Inland Fisheries.

A. WILLIS ROBERTSON,* Chairman.

Richmond, Va., July 10, 1928.
